

**DITEK MT SERIES
INSTALLATION INSTRUCTION**

NOTES:

1. This unit must be connected in series with the equipment to be protected.
2. This is done by connecting the standard RJ21X "IN" (male) / "OUT" (female) connectors with cable assemblies.
3. Always have one common ground per system to eliminate the possibility of a differential in ground potentials.
4. Green wire is for connecting the ground, and it must be connected to the common ground, with 25 ohms or less.
5. For mounting, use double-sided tape (supplied), or two #8 screws. (Not supplied).
6. For further information or technical support please call 1-888-472-6100.

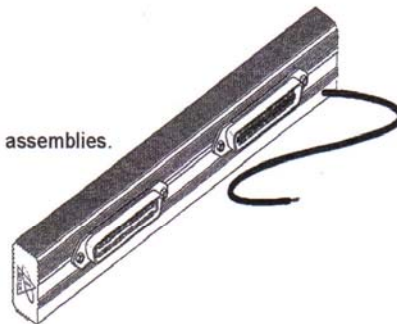

FOR FURTHER INFORMATION CONTACT TECHNICAL SUPPORT AT 1-800-753-2345
DITEK CORPORATION, LARGO, FL

#191131
