

Multi-Family Protection

Protect Multi-Family Communities From Power Surges

For over 30 years, commercial and industrial property owners have trusted DITEK to preserve their facilities, electronics, and data from the negative impacts of power surges.

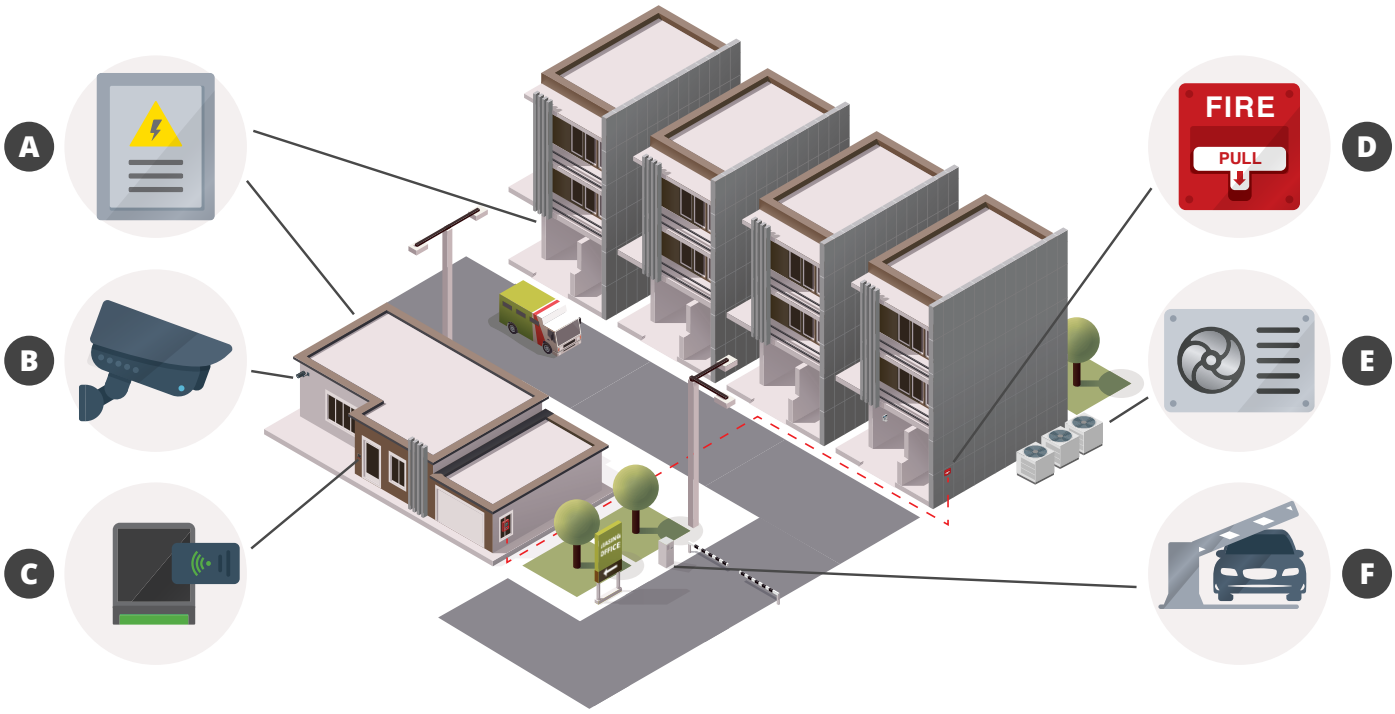

One power surge can create problems across an entire community, from a gate that won't open to a security system that goes offline.

In multi-family properties, shared systems mean shared consequences. An electrical disruption can affect dozens of households while creating urgent service calls, unexpected expenses, and extra work for property managers. DITEK Surge Protection helps protect the equipment behind everyday essentials, including gate management, fire alarms, video surveillance, elevators, and HVAC units. Building surge protection into your property helps preserve your investment, reduce maintenance headaches, and deliver the reliability residents expect.

REDUCE DOWNTIME

EXTEND EQUIPMENT LIFE

IMPROVE CUSTOMER SATISFACTION

A ELECTRICAL SERVICE & ELEVATOR DISCONNECT

FEATURED PRODUCT: D200M SERIES

Protect your entire electrical system from damaging power surges with built-in safety features to support reliable, ongoing operation.

B VIDEO SURVEILLANCE

FEATURED PRODUCT: NETS SERIES

Designed for high-speed networked equipment to help keep security and connectivity in place and protect essential devices.

C ACCESS CONTROL

FEATURED PRODUCT: LVLP SERIES

Maintain secure access to buildings and restricted areas by guarding access control systems against damaging power events.

D FIRE SAFETY

FEATURED PRODUCT: DEFLECTOR SERIES

Shield life safety systems from damaging power surges and products alert staff immediately if protection is compromised.

E HVAC

FEATURED PRODUCT: D50 SERIES

Safeguard HVAC systems against damaging transient surges and spikes that can disrupt performance and shorten equipment life.

F GATE ACCESS MANAGEMENT

FEATURED PRODUCT: 120SLR SERIES

Protect gate operations and keep vehicle entry points secure by preventing system disruptions.
