# **INSTALL INSTRUCTIONS**

## DTK-120/240XD

**NOTICE:** This SPD should be installed by a licensed contractor in accordance with all applicable National and Local Electrical Codes and the following instructions.

### **APPLICATION**

Type 1 SPD for hardwired installation on 120/240 VAC split phase electrical service.

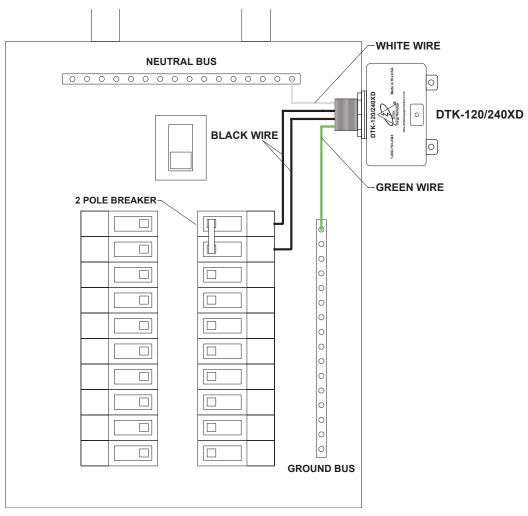

### **INSTRUCTIONS**

Caution: Measure all voltages to verify applied voltage does not exceed the voltage rating of the unit. Improper installation voids the warranty.

**NOTE:** Suitable for use on a circuit capable of delivering not more than 100,000 rms symmetrical Amperes. Recommended circuit breaker size is 20 Amps. This SPD contains no serviceable parts.

- 1. Turn off the power at the circuit breaker or main breaker before beginning installation.
- 2. Remove front cover from the electrical panel.
- 3. Determine the ideal mounting position of the SPD by orienting the unit as close as possible to the position of the 2-pole circuit breaker selected for the SPD connection.
- 4. Remove a 3/4" knockout in the electrical panel or drill a 3/4" NPT hole in the electrical panel.
- 5. Feed all wires through the knockout hole and secure the SPD to the electrical panel with the 3/4" locknut.
- 6. Connect the Ground wire (Green) to the Grounding bus of the panel.
- 7. Connect the Neutral wire (White) to the Neutral bus of the panel.
- 8. Connect the (2) Phase wires (Black) to the load side of the 2-pole circuit breaker.
- 9. Make sure the wire leads are as short as possible.
- 10. After all connections have been made and no hazards exist, replace panel cover and restore power.
